v9.7.19—12/06/2017			

Upgrading:

Firmware upgrade path:

Current Firmware Version	Upgrade Path	Hardware	File
v9.4.x	Upgrade to v9.7: build #	• xxx (PN1, PN2, PN3) • xxx (PN4)	FileName.bin
v9.5.x	Upgrade to v9.7: build #	• xxx (PN1, PN2, PN3) • xxx (PN4)	FileName.bin
v9.6.x	Upgrade to v9.7: build #	• xxx (PN1, PN2, PN3) • xxx (PN4)	FileName.bin
v9.7.x	Upgrade to v9.7: build #	• xxx (PN1, PN2, PN3) • xxx (PN4)	FileName.bin

NOTE: Migrating the Database – Due to the extensive number of changes between v9.7 and previous versions, migrating an existing database into v9.7 is not supported.

Fixed in This Release

System Software: Survey	**ABC-9844** In some cases after an upgrade, the system became slow and sluggish.
System Software: Survey	**ABC-9841** The client crashed in the following case: While shooting, with a large number of shots in the collection queue, and entering comments.
System Software: Survey	**ABC-9840** While shooting with a long line, the client crashed after deleting a xxx.
System Software: Survey	**ABC-9831** The client crashed because the file-name.exe file was missing from the c:\path directory.

Table 4—1 Known Issues	
ABC-4188 Firmware	**Description** – Xxxx fails if xxx is low. **Workaround** – Manually redeploy the xxx
ABC-4096, Firmware	**Description** – After a firmware upgrade, the xxx indicators reflect the results from the test performed prior to the firmware upgrade, and may not be correct. **Workaround** – Manually redeploy the xxx.
ABC-3882, System software: User Interface	**Description** – In some cases, clicking between windows causes the windows to become undocked. **Workaround** – Click more slowly and ensure that you are not clicking and dragging as that causes the window to undock.
ABC-3864, System software: Other	**Description** – The Equipment Table total row count does not recalculate when xxx. **Workaround** – Change any filtered column's filter then change it back. Or toggle the All Filters button and toggle back. The counts total will be updated.
ABC-3861, System software: Shot-Based Acquisition	**Description** – The xxx does not update when you change the roll until you select a different row. **Workaround** – None
ABC-3825, System software: Installation	**Description** – Server installer prompts twice for uninstalling the previous version. **Workaround** – Click Yes for both prompts. The install should progress normally.
