2.6 General Requirements

This section describes the requirements that are of a general nature regarding the Product System.

Requirement	Release	Description
2.6.10	1.0	The Product System shall require each user to login to the system before any presence features are enabled.
Justification:		
2.6.20	1.0	The Product System shall require the user to login to the system before any conferencing features are enabled.
Justification:		
2.6.30	1.0	The Product System shall allow the user to submit textual feedback between I and 8000 alpha-numeric and non-control characters to The Company at feedback@company.com.
Justification: Feedback is particularly helpful during beta periods.		
2.6.40	1.0	The Product System shall allow the user to email technical support staff at support@company.com.
Justification:		
2.6.50	1.0	The Product System shall allow the user to request an interactive text conference with technical support personnel.
Justification:		
2.6.60	1.0	The Product System interface shall allow the user to change the configuration settings of the interface without logging in (establishing a connection).
Justification:
