ETP101   The Xxxxxxx Xxxxxxxxxx Process

Description

The Xxx Process provides a two-hour overview that covers an introduction to the Xxx Process, including a description of the project phases, iteration, the Xxx Process, the Xxx Toolset, and the evolution of the Xxx Xxx Process.

The Xxx Xxx Process is a family of techniques that supports the complete software development life cycle. The result is a component-based process that is use-case driven, architecture-centric, iterative, and incremental.

Objectives

This course will enable the participants to:

- Gain an overview of the Xxx Process
- Understand the reasons for having a process
- Understand development lifecycle, iterations, workflows, and artifacts
- Understand the history of process development
- Understand the advantages of XXX over the Classic development process
- Understand what XXX means
- Gain an overview of Xxx Language
- Gain an overview of the Company Training Plan

Topics Covered

The following topics are covered in this course:

- Introduction to the XXX
- Project phases
- Iteration
- Xxx Process
- Xxx Toolset
- Evolution of the Xxx Process

Duration

Two hours

Prerequisites

None
