3.2 Configure the Vib Pro

This section describes how to set the Vib Pro jumpers, connect the Vib Pro to the SIU, and configure the Vib Pro for use with the Product.

To configure the Pelton Vib Pro:

1   Check prerequisites:
   - ✓   The central recording system computer is installed
   - ✓   The Product software is running
   - ✓   The Vib Pro is powered down

2   Open the back of the Vib Pro and remove the interface card. Use proper anti-static precautions. Refer to the Pelton documentation as necessary.
